

## Caring for your chair

With regular care and maintenance, your dewet chairs will provide many years of superior performance and satisfaction. To maintain the quality of your dewet chair, please follow the cleaning procedures outlined here.

### Base, Frame and Armpads

#### Normal Cleaning

- Wash surface with a soft cloth soaked in mild detergent and warm water
- Rinse thoroughly and dry with a soft cloth
- Do not use solvents or abrasive kitchen cleaners

#### Water-based Stains such as coffee, soft drinks, fruit juices or milk

- Use a water-based cleaner (specifically made for cleaning fabric) or a solution of mild (alkaline) warm soapy water (not overly soapy) applied with a damp clean cloth or sponge
- Work the cleaner into a lather or foam
- Soak up all remaining solution and then use a clean cloth or sponge dipped in cool water to remove any residue
- Never use hot water; it will set the stain
- Avoid scrubbing

#### Oil-based Stains such as lipstick, grease or salad dressing

- Use a dry-cleaning solution applied with a damp clean cloth or sponge
- Test the cleaning solution on a small, concealed area first
- If there is no spotting, ringing, or damage to the fabric or its dyes, apply the cleaning solution to the soiled area with light, quick strokes
- Begin at the outside of the stain and work toward the center, being careful not to over-saturate the fabric
- Do not over apply water or any liquid solution to fabric
- Excessive wetting of the fabric with any liquid solution may result in permanent damage to the material
- Do not rub too vigorously or you may damage the nap of the fabric or break fibres
- Several light applications are better than one heavy application
- Soak up all remaining solution and then use another clean cloth or sponge dipped in cool water to remove any residue
- Let fabric dry thoroughly and then vacuum well before using
- If the stain resists cleaning, contact a professional cleaner
